

TM

DO IT IN A WINDOW

Other features: completely dynamic memory management, arithmetic, logical, string, and list manipulations, structured control primitives, Simula-like classes and instances, menus and other friendly input techniques, and a screen-oriented hypertext editor that formats source code automatically.

ROSETTA SMALLTALK™ now runs on the Exidy Sorcerer™ computer! It requires 48K of memory, a disk, and CP/M™. Field-testing is now in progress, and the Pre-Release Version will be available at the end of June, 1980. Write for details.
